Progress report of clinical trial on “Bone Void Filler TDM-711”

Regarding clinical trial on dental implant product “Bone Void Filler” (develop code: TDM-711) conducted by 3-D Matrix. Inc. (3DM US), a consolidated subsidiary of 3-D Matrix, Ltd. (3DM Japan), the progress is reported below.

This clinical trial had been conducted at Forsyth Institute, a research institute of medical and dental school of Harvard University since February, 2012; operations in 15 cases stipulated in the protocol were completed and any serious adverse events were not reported concerning all cases. Based on this result, discussion with Food and Drug Administration (FDA) is beginning for next stage.

3DM Japan continues to conduct this clinical trial and develop this technology for commercialization and seek sales partners in the U.S.

This clinical trial does not influence the earning forecast of 3DM Japan at this moment.
